

Dear

Date: __/__/__

The Government's 10-Year NHS Plan has some good elements, but I have concerns:

- **Privatisation means handing services to companies which profit at patients' expense – profits that often go overseas without being adequately taxed**
- **Costly new public-private schemes resemble the old Private Finance Initiatives which let private firms' profit while leaving the public with 30 to 40 year debts**
- **Patients risk being left behind by digital healthcare where it is used as a substitute for face-to-face care**
- **Training must be made affordable for NHS staff and students**
- **NHS staff must be properly paid to encourage recruitment and retention**

Also I am particularly concerned about:

Please act to Protect a Publicly Funded, Publicly Delivered NHS

I look forward to your reply

Yours sincerely
